How To: Access a candidate's entire social footprint, wherever you go on the web

Download the Open Web Chrome Extension at the Google Chrome Web Store. Once installed, a red "D" icon will appear on the upper right of your Chrome browser. (You can <u>download the Chrome browser</u> <u>free here</u> if you don't have it.)

Viewing social profiles

- Source candidates on a social network such as GitHub, Twitter or Facebook.
- When viewing a profile of a candidate you're interested in, look for a blue + to appear next to the "D" icon. When it does, Open Web has found a match.
- 3 Click on the "D" and then on "View Profile" to see the candidate's social footprint and contact information on Dice.

Viewing email addresses in your ATS or on the web

- You can also highlight any email address found in your ATS, on the web or even in a web-based email client like Gmail or Yahoo Mail to see if Open Web has a match.
- 2 Click on "View Profile" to see the candidate's social footprint and contact information.
